

CONVENE

for CITIES

CONVENE PRODUCT SUITE

Convene ERP / DXP is a dual-focused platform, integrating Enterprise Resource Planning (ERP) and Digital Experience (DXP) functionalities. It provides a cohesive technical framework for building multiple products and applications. Our strategy emphasizes standardization, efficiency, security, compliance, and personalization, making Convene a universal intelligent business platform. Investing in platforms like Convene enables companies to develop, improve, upgrade, and customize products faster and more cost-effectively than building stand-alone solutions.

Benefits of Convene include:

- Comprehensive enterprise-level software suite
- Centralized data management
- Seamless cross-product and platform integration
- Advanced intelligence and analytics
- Strategic scalability, interoperability, mobility, and automation
- Secure AI and machine learning
- Relationship-centric design
- Robust security and compliance

CONVENE ENGAGE

Convene's Engage Module is a powerful and versatile software platform that allows people to come together and build vibrant communities. With customizable groups that feature membership options, events, topics, and activity streams, Engage provides everything you need to create a thriving community.

Whether you're looking to connect with like-minded individuals, build a professional network, or simply share your interests and passions with others, Engage is the perfect tool for the job. With its intuitive and easy-to-use interface, you can quickly and easily create a community that meets your specific needs and goals. Smart communities start here!

AFFINITY GROUPS

Features associated with affinity groups

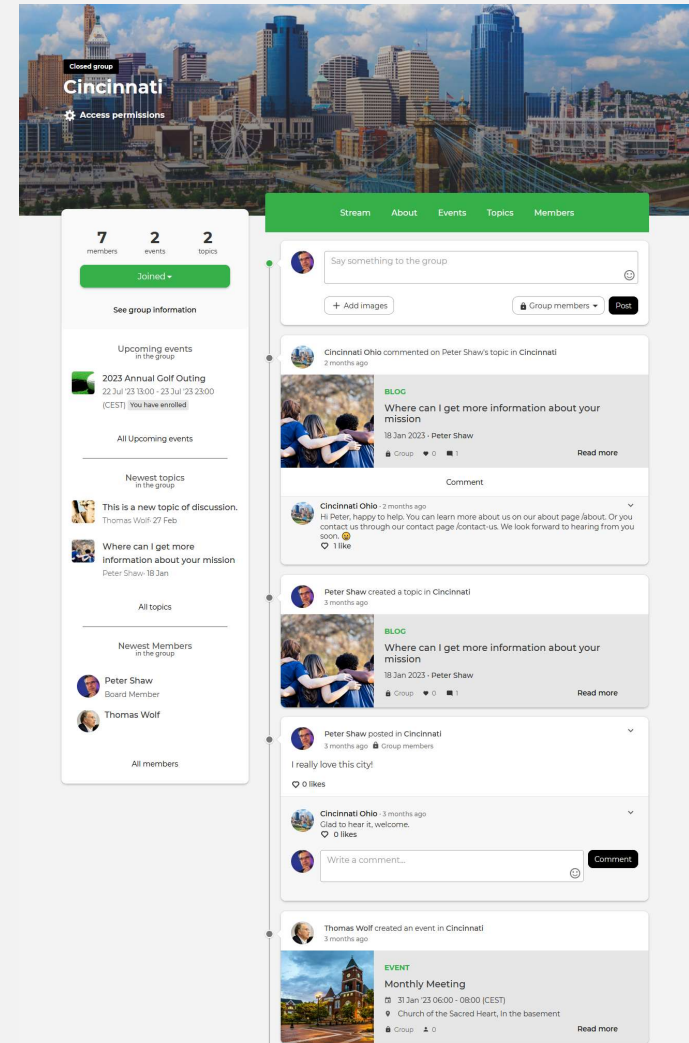

GROUPS

Convене ERP/DXP's groups are a way for users to create online communities, share information and interact with one another.

Benefits of Convене include:

- Groups allow users to create content that is contextual to that group and organized into the group. Users can create content such as posts, events, topics, and albums.
- Groups can optionally be configured so that only site administrators or community moderators can create groups.

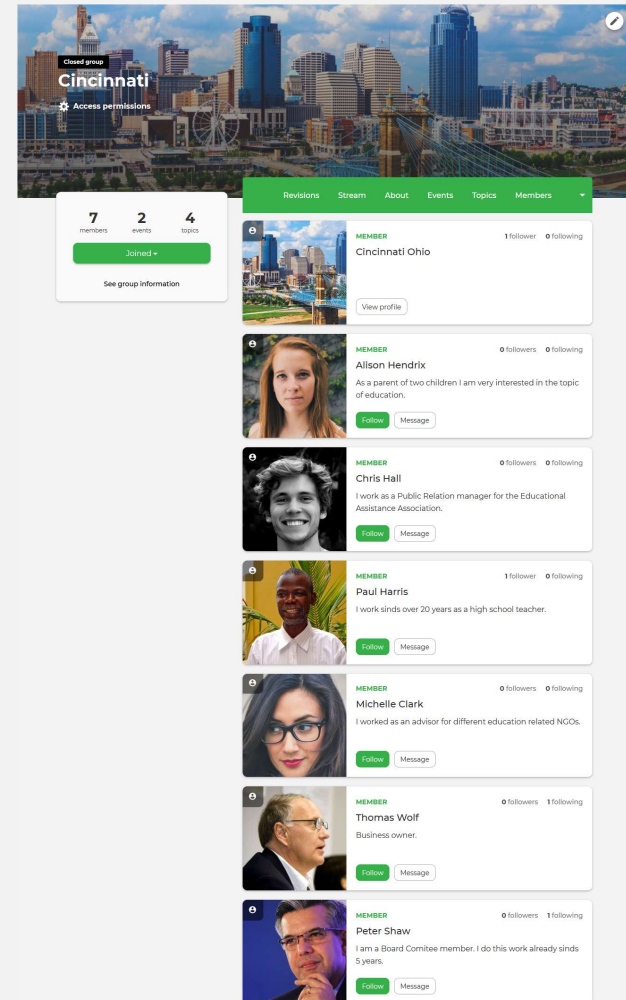

GROUPS: MEMBERS

Convene ERP/DXP allows users to join your groups. Group configurations control the way in which people can find and join a group.

Benefits of Convene include:

- **Secret:** Users can only join by invitation and the group itself and its content are hidden from nonmembers. (Often used as Employee and Board Portals)
- **Public:** Users may join without approval and all content added in this group will be visible to all community members and anonymous users.
- **Open:** Users may join without approval and all content added in this group will be visible to all community members.
- **Closed:** Users can only join by invitation and the content in the group is hidden from nonmembers.
- **Flexible:** Customize many group settings to your needs.

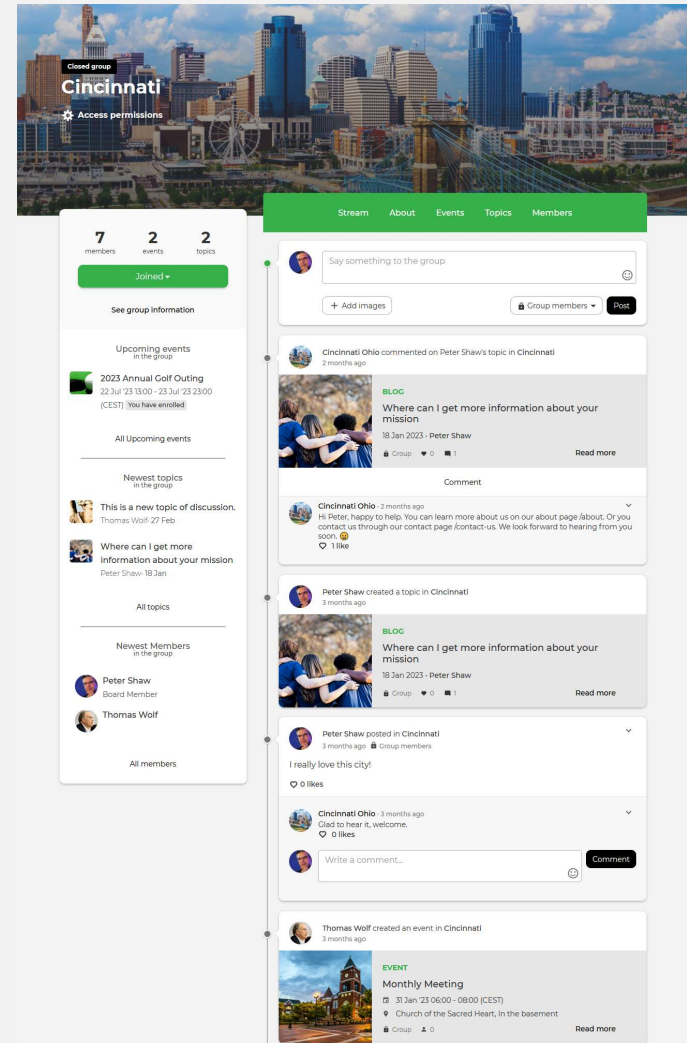

GROUPS: STREAMS

Convене ERP/DXP streams are content feeds that shows and manages the activity within a group.

Benefits of Convене include:

- Users can directly write and post content to the stream(s)
- Posts can be both images and written content
- Users can comment on and like posts (includes emojis)
- The stream(s) automatically show new events or topics that are created within the group
- Streams are also benefit from notifications and alerts, so nothing falls through the cracks.

GROUPS: EVENTS

Convене ERP/DXP events can be created in a group that other users can join. Events come with a variety of configurations that allow you to control how people can join. **Engage** events can be for free or with built-in eCommerce (coming Q3/2024)

Benefits of Convене include:

- Customizable banner image
- Description page with rich media WYSIWYG support
- Date & time selector fields for the Start / End date.
- Optional “All day” toggle
- Location name and address
- Configurable visibility options that allow you control who can see your event such as: Public, Community, and Group members only.
- Enrollment options empower controls for joining.
- “Open Enrollment”, “By Request” “Invite Only”
- “Allow Non-Members”
- “Event Enrollment Confirmation”
- “Set a limit to number of enrollees”
- Option for adding attachments / documents

GROUPS: TOPICS

Convене ERP/DXP enables the creation of topics in a group that members can comment on and engage in a dialog. Topics allow group members to share information or organize discussions.

A topic can be a piece of news, blog, document or a discussion, or hyperlink. Each topic is tagged with a topic type to make it clear what the topic is about.

GROUPS: ALBUMS

Convене ERP/DXP enables the creation of albums when adding multiple images to posts. As albums are created within a group, they become contextual to that group. By default, if the album is created in a group, it will use the visibility settings of the group. If the group is public and you create an album in that group, your album will be public.

The screenshot displays a social media album interface. At the top, it shows a navigation path: < Cincinnati Ohio's Albums. Below this, the word 'ALBUM' is written in green, followed by the title 'Our beautiful city'. The album is attributed to 'Cincinnati Ohio' and dated '12 January 2023', with a 'Community' visibility setting. Interaction options include '0 comments', '0 likes', and a 'Follow content' button. A section labeled '8 Images' contains a grid of eight photos: a city skyline with a bridge, a night cityscape, a fountain, a suspension bridge, a bridge over a river, a large brick building, a street view, and another large brick building. A 'Cover image' label is positioned under the first photo. A '0 likes' indicator is located below the image grid. At the bottom, there is a comment section with the prompt 'Be the first one to comment', a text input field containing 'Add a comment', a 'Comment' button, and an 'Add attachment' dropdown menu.

CONVENE'S MODEL FOR UNIFICATION

OMNIPOINT 360 is a comprehensive solution that unifies disparate systems into a single data silo. This integration enhances efficiency and accelerates data summarization and presentation. Tasks and reports that typically require extensive resources are completed in seconds, saving time, money, and manpower.

OMNIPOINT 360 is the **Dynamic Directive(TM)** service solution that manages your evolving workflow with consistency and standardization, eliminating chaos. This process clarifies the necessary steps, allowing you to focus on your goals without interruption.

THANK YOU
